

# Recovery Testing

A feature available with Cove Data Protection

Cove Data Protection™ recovery testing offers regular automated test recoveries of your most critical devices. Save time and gain peace of mind with reports featuring screenshot verification that your system state, file, and folder backups are recoverable—and ready when you need them most.

## Automatically test backup recoverability

- Enroll your most critical Windows® servers or workstations in the recovery testing plan once, and testing will automatically occur every 30 or 14 days
- Save time: no need to download and install the Recovery Console
- Save resources: no need to find hardware or stand up a VM for testing

## Verify successful recovery

- A test VM is spun up in a cloud environment provided by N-able, the backup is restored, and a screenshot is captured to verify successful recovery
- The VM is deleted immediately upon test completion

## Understand recovery time frames

- Test recovery results appear in the device properties and can be shown in the main dashboard by customizing your view
- Review all recovery test results in the dedicated Recovery Testing dashboard
- Gain a sense of how long a specific device recovery may take

## Report and demonstrate value to customers

- Automatically send recovery test results with monthly reports to customers
- Preserve records of test recoveries for future reference
- Showcase the value of your data protection service and provide peace of mind

Please note that recovery testing is available only in the standalone and N-central®-integrated versions of Cove Data Protection.

N-able, Inc. (NYSE: NABL), the solutions partner helping IT services providers deliver security, data protection, and remote monitoring and management services.

N-able fuels IT services providers with powerful software solutions to monitor, manage, and secure their customers' systems, data, and networks. Built on a scalable platform, we offer secure infrastructure and tools to simplify complex ecosystems, as well as resources to navigate evolving IT needs. We help partners excel at every stage of growth, protect their customers, and expand their offerings with an ever-increasing, flexible portfolio of integrations from leading technology providers.
